

INTERNATIONAL SUMMIT

SCIENTIFIC PROGRAM

MAY 15-16, 2026

Hosted by

MAY 15, 2026 (FRIDAY)

DAY 1

Block 1

The Real-World Challenges of Critical Care Nephrology

- Opening Remarks & Welcome
- From Evidence to Bedside: The Real-World Challenges of Critical Nephrology
- Critical Nephrology Without Borders: Shared Challenges, Different Realities

Block 2

Precision CKRT: Choosing the Right Therapy

- Timing and Modality in KRT: Choosing the Right Therapy at the Right Moment
- Interactive Clinical Cases: Decision-Making in CKRT
 - Case 1 – Hemodynamic Instability
 - Case 2 – Acute Brain Injury / Neurocritical Care
 - Case 3 – Severe Fluid Overload

Block 3

Optimizing CKRT: Prescription and Program Quality

- The Art of CKRT Prescription: Modality, Dose and Dynamic Targets
- Anchor Case Discussion: Septic Shock and Hepatic Dysfunction
- Citrate Anticoagulation in CKRT: Implementation, Monitoring and a Marker of Program Quality
- Implementing Citrate Programs in Clinical Practice: Challenges and Strategies

Block 4

Beyond Kidney Support: Expanding the Extracorporeal Platform

- From Complexity to Confidence: 20 Years of Ci-Ca in CKRT
- Ci-Ca Ready-to-Use: Clinical Cases and Practical Applications

MAY 16, 2026 (SATURDAY)

DAY 2

Block 5

Expanding Extracorporeal Therapies in Critical Care

- Therapeutic Plasma Exchange in the Critically Ill: Integration within the CKRT Platform
- Clinical Cases: Therapeutic Plasma Exchange in the ICU
- The Lung–Kidney Interaction in Critical Illness
- Extracorporeal CO₂ Removal: Clinical Integration and Case-Based Discussion
 - Case 1 - Remoção Extracorpórea CO₂
 - Case 2 - ECMO + CRRT
- The Future of Extracorporeal Organ Support: From Innovation to Clinical Impact
